

# Moly Slip

## THE INDUSTRIAL MOLYSLIP 'TOP TEN'

### **Combat**

*A unique water displacing, anti-corrosive penetrating and releasing fluid. Will remove water, damp and loose dirt from any surface.*

### **Copaslip**

*A unique high temperature assembly and anti-seize compound, highly resistant to salt water. Eliminates seizure, galling and corrosion. Facilitates dismantling, even after exposure to high temperature and corrosive conditions.*

### **Molyslip AS40**

*An anti-scuff and assembly paste, which gives lasting protection and prevents corrosion.*

### **Molyslip LQG**

*A free flowing molybdenum disulphide fortified liquid grease, which penetrates like an oil, does not drain off or dry off, even in extreme temperature environments. In contact with air it becomes a high grade light grease.*

### **Molyslip MPG**

*A high quality multi-purpose molybdenum disulphide fortified grease with no melting point.*

### **Molyslip ADF**

*An air drying film of pure molybdenum disulphide in an air drying bonding resin. For pre-treatment of bearings, gears, pistons, drill collars, threads and all working surfaces.*

### **Molyslip HSB**

*A high speed bearing grease with extreme pressure and anti-corrosive properties. An excellent lubricant for ball, roller and needle roller bearings.*

### **Molyslip E and G**

*Wear reducing lubricating oil supplements containing molybdenum disulphide for all engines and gearboxes (not automatic transmissions).*

### **Molyslip OGL**

*An open gear lubricant especially suitable for fifth wheel couplings, roller assemblies, skip loaders, winches, cables or any job where basic lubrication is needed in an environment open to dirt, dust and water.*
