

Anabond Non-Corrosive RTV Silicone Sealants

Anabond Non-Corrosive RTV Silicone Sealants are one-part, room temperature hardening, neutral curing, high performance compounds. Made out of **100% silicone**, they are used by major car makers such as Hino, Isuzu, Suzuki, Leyland, Toyota and Mitsubishi. The diversified industrial usage includes automotive assembly and maintenance, electrical and electronic gadgets assembly, machine building and maintenance of heavy equipment.

Available in 6 colours. High performance. Multi-purpose. Exclusively designed to meet your needs.

Hi-Temp RTV Silicone Gasket Maker

Exclusively designed to withstand high temperature applications of flange joints in automobiles. The non-corrosive sealant also withstands high pressure and ensures leak proof joints. Available in Red, Blue and Gold.

Packing : 85 grams, 310grams cartridge

Red
(ABS0285)

Blue
(ABS0485)

Gold
(ABS0685)

Aluminium Silver Silicone Liquid Gasket

A specialty non-corrosive silicone gasketing sealant suitable for medium & light duty engines of cars, motorcycles & portable generating sets etc.
Packing : 85 grams, 310grams cartridge

Autosil Black Silicone Windscreen Sealer

A specialty non-corrosive silicone sealant for sealing automobile windscreens. The cured sealant exhibits good adhesion and resistance to atmospheric ageing. Other applications include roof tops, gasketing, rubber soles etc.
Packing : 85 grams, 310grams cartridge

Professional Clear RTV Silicone Sealant

A non-corrosive translucent silicone sealant for industrial (eg. gasket) and home (eg. aquarium tanks, basins) applications. Suitable to seal and bond glass, wood, ceramic, plastic and concrete joints.
Packing : 85 grams, 310grams cartridge

Why choose Anabond 100% Silicone Sealants?

- Non-corrosive on metal
- Optimum durability
- Strong resistance to high temperature and moisture
- Longer service life
- Do not emit acidic odour
- OEM approved

Higher Performance. Stronger Adhesion. Lower Maintenance Cost

After 24 hours of contact

No sign of rust with **Anabond** non-corrosive silicone

Nail turned rusty with corrosive silicone by other brands

Automotive and Industrial Sealants

Anabond 696 Liquid Gasket

Anabond 696 Liquid Gasket is a one part, rubber base sealant specially formulated for automotive gasketing applications. It has an excellent gap filling ability and is ideal for numerous applications where a long lasting, faultless seal is required. This highly reliable liquid gasket has met requirements of Japanese Standard JIS K6820-Type 2.

Recommended Application – Gearbox covers, engine joints, all machined flanges and pipe joints etc

100 grams
(ABLG696-100)

Anabond Windscreen Sealant Butyl Tape

Anabond Windscreen Sealant Butyl Tape is a non-curing, pressure sensitive, self-sealing Butyl rubber base tape that is specially formulated for the installation of all gasket-less windshields and backlights. This high quality Butyl sealant not only can prevent entry of water, it also offers excellent compressibility in both low and high temperature.

Recommended Application – windscreen, backlights

Packing : Square-9.5mm x 9.5 mm (ABBTS457),
Round-9.5mm in diameter (ABBTR457)

Anabond Thread Locker

Anabond Thread Locker is a single component, anaerobic, liquid adhesive formulation. When applied onto fasteners, it cures to secure fastener assemblies to withstand heavy vibration, resist shock and impact loads. In addition to locking bolts and nuts, studs and screws, the adhesive also seals the threads therefore preventing leaks and corrosion.

Recommended Application – bicycle pedal screws, motorcycle mirror nuts, chassis bolts and nuts, shock absorber bolts and nuts, 'U' clamp bolts, carburettor caps etc.

10ml, Blue
(ABTL0010)

Anabond Bearing Retainer

Anabond Bearing Retainer is a single part, fast curing, anaerobic adhesive. It distributes load evenly, enhances reliability and withstands severe shock loads. With these qualities, this high performance adhesive helps to prevent wearing out of housing and shaft, prolonging the life of assembly.

Recommended Application – Slip fitment of bearings, bushes, gears and sleeves etc.
